

Lab Assignment -14_5

Name:Anand

Hallticket:2303A51090

Batch-02

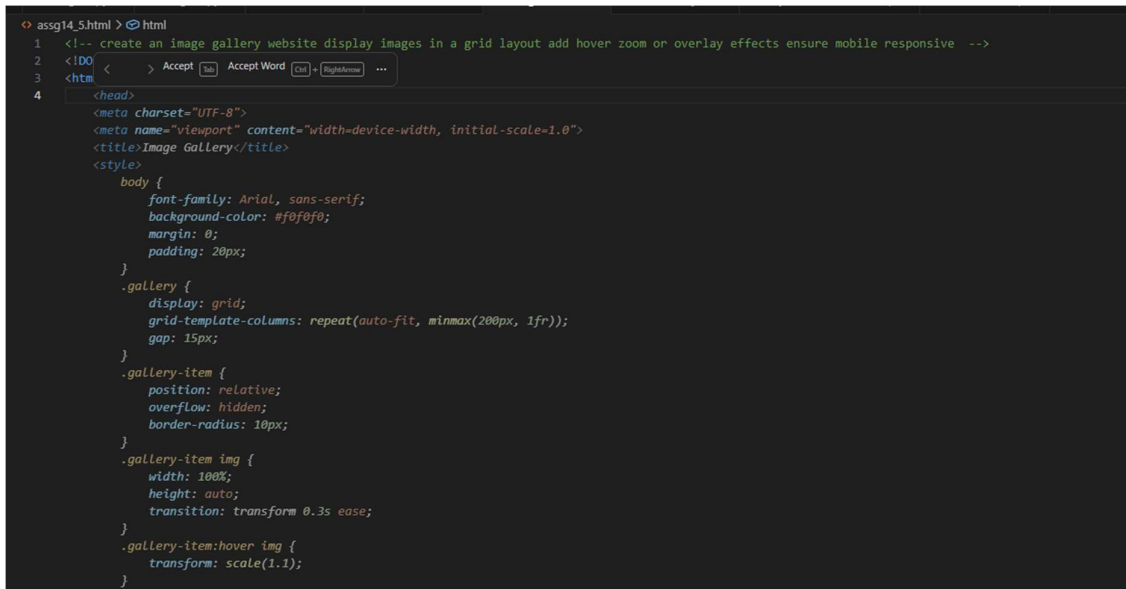

Task 1 – Image Gallery Website

Create an image gallery web page.

Requirements:

- Display images in a grid layout.
- Use AI to:
 - o Optimize layout using CSS Grid.
 - o Add hover zoom or overlay effects.
 - o Ensure mobile responsiveness.

Screenshots:

```
assg14.5.html > html
1 <!-- create an image gallery website display images in a grid layout add hover zoom or overlay effects ensure mobile responsive -->
2 <!DOCTYPE html>
3 <html>
4   <head>
      <meta charset="UTF-8">
      <meta name="viewport" content="width=device-width, initial-scale=1.0">
      <title>Image Gallery</title>
      <style>
        body {
          font-family: Arial, sans-serif;
          background-color: #f0f0f0;
          margin: 0;
          padding: 20px;
        }
        .gallery {
          display: grid;
          grid-template-columns: repeat(auto-fit, minmax(200px, 1fr));
          gap: 15px;
        }
        .gallery-item {
          position: relative;
          overflow: hidden;
          border-radius: 10px;
        }
        .gallery-item img {
          width: 100%;
          height: auto;
          transition: transform 0.3s ease;
        }
        .gallery-item:hover img {
          transform: scale(1.1);
        }
      </style>
    </head>
  </html>
```

Image Gallery

Task 2 – Profile Card Generator

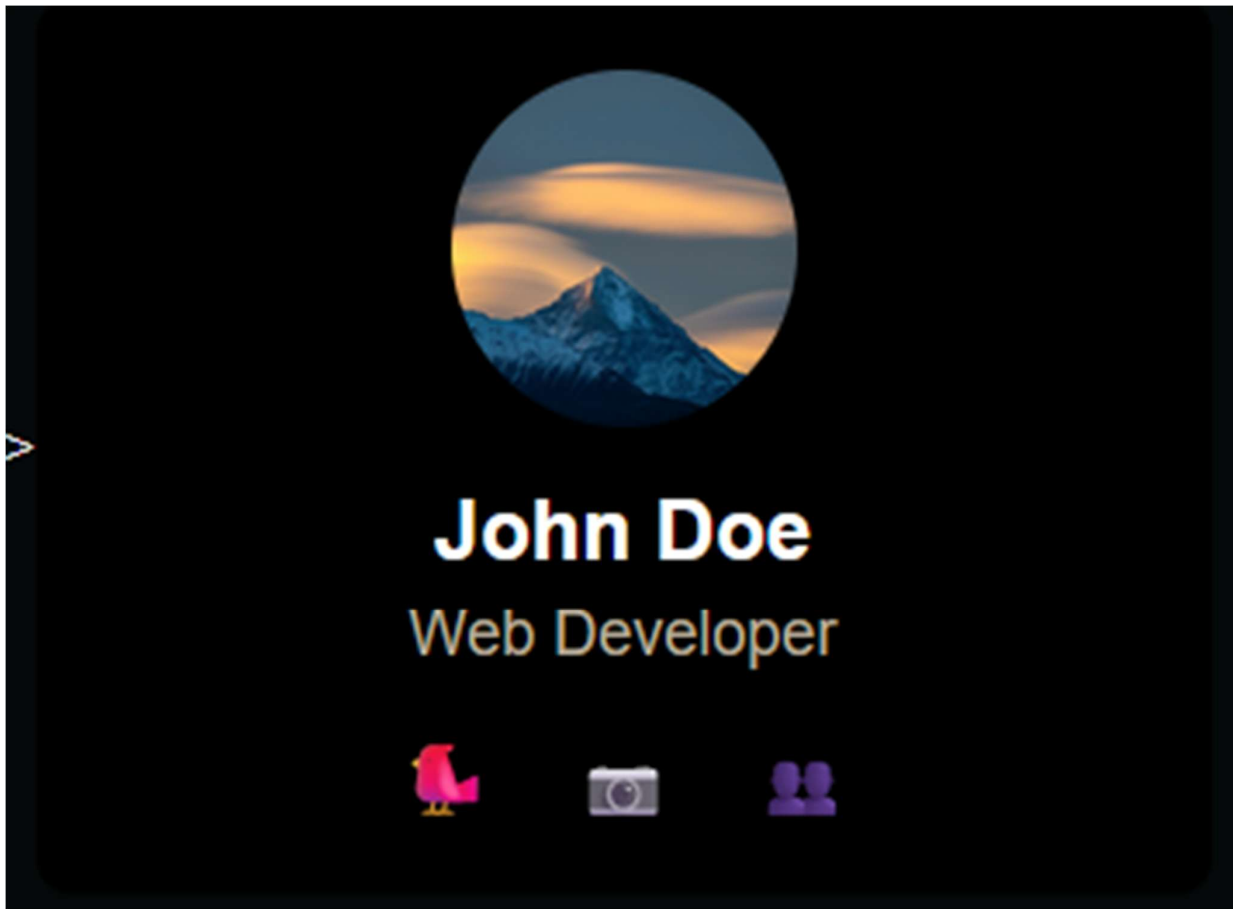

Create a profile card web page.

Requirements:

- Display user image, name, role, and social media links.
- Use AI to:
 - o Suggest modern UI colors and fonts.
 - o Design the card using Flexbox.
 - o Add hover animation and shadow effects

screenshots:

```
74  
75 <!-- create a profile card webpage ,display user image ,name ,role,and social media links with modern ui colours and fonts and design using flexbox and hover animations and shadow effects-->  
76 <!DOCTYPE html>  
77 <html lang="en">  
78 <head>  
  <meta charset="UTF-8">  
  <meta name="viewport" content="width=device-width, initial-scale=1.0">  
  <title>Profile Card</title>  
  <style>  
    body {  
      font-family: 'Arial', sans-serif;  
      background-color: #f4f4f4;  
      display: flex;  
      justify-content: center;  
      align-items: center;  
      height: 100vh;  
      margin: 0;  
    }  
    .profile-card {  
      background-color: #fff;  
      border-radius: 15px;  
      box-shadow: 0 4px 8px rgba(0, 0, 0, 0.1);  
      width: 300px;  
      text-align: center;  
      padding: 20px;  
      transition: transform 0.3s ease, box-shadow 0.3s ease;  
    }  
    .profile-card:hover {  
      transform: translateY(-10px);  
      box-shadow: 0 8px 16px rgba(0, 0, 0, 0.2);  
    }  
    .profile-image {  
      width: 100px;  
      height: 100px;  
      border-radius: 50%;  
      object-fit: cover;  
      margin-bottom: 15px;  
    }
```

Task 3 -Develop a dynamic shopping cart system.

Requirements:

- Add, remove, and update product quantities.
- Display real-time total price.
- Use AI to:
 - o Manage cart state using JavaScript objects.
 - o Persist cart data in localStorage.

Screenshots:

```

14     <title>Shopping Cart</title>
15     <style>
16       body {
17         font-family: Arial, sans-serif;
18         background-color: #f0f0f0;
19         margin: 0;
20         padding: 20px;
21       }
22       .cart {
23         max-width: 600px;
24         margin: 0 auto;
25         background-color: #fff;
26         padding: 20px;
27         border-radius: 10px;
28         box-shadow: 0 4px 8px rgba(0, 0, 0, 0.1);
29       }
30       .cart-item {
31         display: flex;
32         justify-content: space-between;
33         align-items: center;
34         margin-bottom: 15px;
35       }
36       .cart-item input {
37         width: 50px;
38       }
39       .total {
40         font-size: 24px;
41         font-weight: bold;
42         text-align: right;
43       }
44     </style>
45   </head><body>
46     <div class="cart">
47       <h1>Shopping Cart</h1>
48       <div id="cart-items"></div>

```

Shopping Cart

Product 1

Price: \$10.00

Product 2

Price: \$20.00

Cart

Product 1 - \$10.00 x 1

Product 2 - \$20.00 x 1

Total: \$30.00

Task 4 – Role-Based Access Control Application

Create a role-based web application.

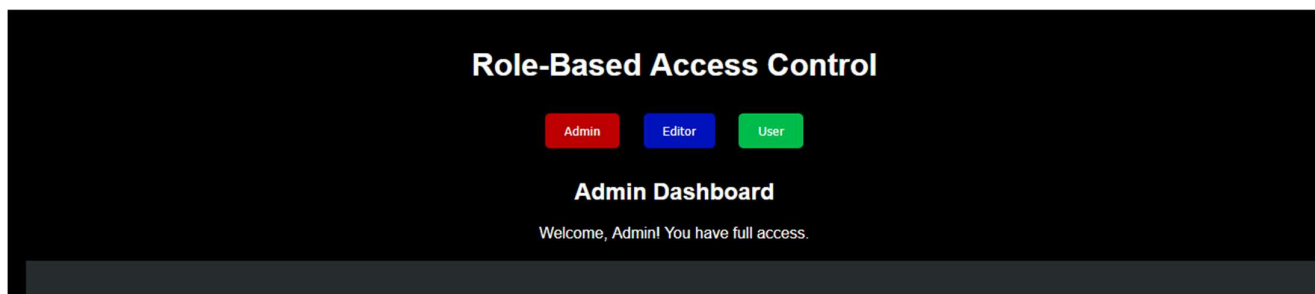

Requirements:

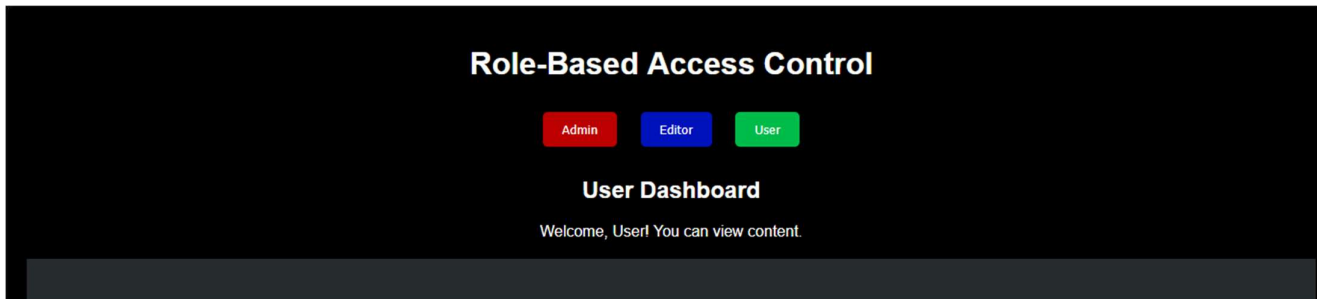

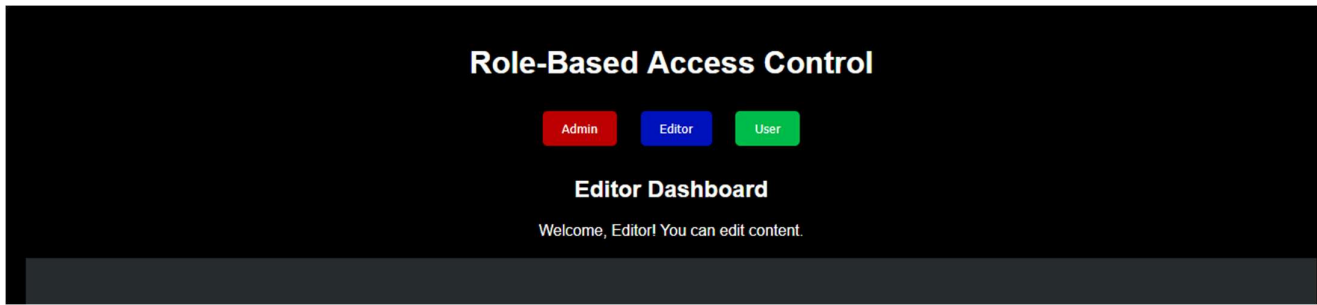

- Admin, Editor, User roles.
- Conditional UI rendering.
- Use AI to:

- o Design access control logic.
- o Maintain secure state transitions.
- o Create scalable UI components.

Screenshots:

```

14  <html lang="en">
15  <head>
16    <meta charset="UTF-8">
17    <meta name="viewport" content="width=device-width, initial-scale=1.0">
18    <title>Role-Based Access Control</title>
19    <style>
20      body {
21        font-family: Arial, sans-serif;
22        background-color: #f0f0f0;
23        display: flex;
24        justify-content: center;
25        align-items: center;
26        height: 100vh;
27        margin: 0;
28      }
29      .container {
30        background-color: #fff;
31        padding: 20px;
32        border-radius: 10px;
33        box-shadow: 0 2px 5px rgba(0, 0, 0, 0.1);
34        text-align: center;
35      }
36      .button {
37        padding: 10px 20px;
38        margin: 10px;
39        border: none;
40        border-radius: 5px;
41        cursor: pointer;
42      }
43      .admin { background-color: #ff4d4d; color: #fff; }
44      .editor { background-color: #4d79ff; color: #fff; }
45      .user { background-color: #4dff88; color: #fff; }
46    </style>
47  </head><body>
48    <div class="container">
49      <h1>Role-Based Access Control</h1>
50      <button class="button admin" onclick="setRole('admin')">Admin</button>
51      <button class="button editor" onclick="setRole('editor')">Editor</button>
```

Task 5 – Multi-Language Website

Design a multilingual website.

Requirements:

- Switch languages dynamically.
- Persist language preference.
- Use AI to:
 - o Structure translation files.
 - o Handle RTL/LTR layouts.
 - o Improve accessibility.

Screenshots:

```

19      <style>
20          body {
21              font-family: Arial, sans-serif;
22              background-color: #f0f0f0;
23              margin: 0;
24              padding: 20px;
25          }
26          .language-switcher {
27              margin-bottom: 20px;
28          }
29          .content {
30              background-color: #fff;
31              padding: 20px;
32              border-radius: 10px;
33          }
34      </style>
35  </html>
36  <body>
37      <div class="language-switcher">
38          <button data-lang="en">English</button>
39          <button data-lang="es">Español</button>
40          <button data-lang="ar">العربية</button>
41      </div>
42      <div class="content" id="content">
43          <!-- Content will be loaded here based on language selection -->
44      </div>
45
46      <script>
47          const translations = {
48              en: {
49                  welcome: "Welcome to our multilingual website!",
50                  description: "This website supports multiple languages. Please select your preferred language."
51              }

```
